SUMMARY

BCA graduate with hands-on DevOps projects using Jenkins, Git, Docker, Kubernetes, Linux, Bash, and AWS/Azure. Built an 11-stage CI/CD pipeline with security scans and Kubernetes deployment, and configured Prometheus and Grafana monitoring. Seeking an entry-level Cloud / DevOps Engineer role focused on automation, reliable deployments, and cloud operations.

TECHNICAL SKILLS

Cloud:	Amazon Web Services (Load Balancer, Auto Scaling, S3, CloudFront, WAF, Systems Manager, SNS, RDS, Route 53, Amazon EBS, IAM); Microsoft Azure (VMs, VM Scale Sets, App Service, Storage Account, Front Door, Logic Apps, Active Directory, VPN, Recovery Services Vault, Hub-Spoke, Azure AKS)
DevOps & CI/CD:	Git, GitHub, GitHub Actions, Jenkins, CI/CD Pipelines, Docker, Terraform, Kubernetes
Kubernetes:	Amazon EKS, Deployments, Services, ConfigMaps, Secrets, Ingress, HPA, Namespaces, Helm
Networking & Security:	SonarQube, Trivy, Subnetting, Route Tables, Security Groups, NACLs, NSG, IAM, WAF, CloudTrail, VPC Flow Logs
Monitoring & Observability:	Prometheus, Grafana, Alertmanager, Amazon CloudWatch (Alarms), Azure Monitor
OS & Scripting:	Linux (Ubuntu), Windows, Bash, Python, PowerShell | Nginx, Apache Tomcat, MySQL

PROJECTS

End-to-End DevOps CI/CD Pipeline on AWS EKS github.com/ambatimokesh/CI-CD

- Built an 11-stage Jenkins pipeline on Linux, using Bash for deployment tasks, SonarQube Quality Gate checks, Trivy scans, Docker build/push, and Kubernetes deployment.
- Provisioned Amazon EKS clusters using Terraform; deployed the application and verified workload readiness.
- Created Kubernetes Deployments, Services, ConfigMaps, Secrets, Ingress, and HPA; tested rolling updates and scaling.
- Configured Prometheus, Grafana, and Alertmanager with three alert rules and email notifications.

Secure & Highly Available Multi-VPC Web Application on AWS github.com/ambatimokesh/aws-multi-vpc-ha-failover

- Designed a 3-VPC, 2-AZ architecture connected with Transit Gateway; ran EC2 Auto Scaling (min 2, max 4) behind an ALB.
- Deployed Multi-AZ RDS MySQL in private subnets; secured with WAF, NACLs, least-privilege IAM, Session Manager, and VPC endpoints.
- Added CloudFront, CloudWatch, and SNS alerts; simulated EC2 failure and verified automatic recovery.

Azure Hub-Spoke Network Architecture with Security & Monitoring github.com/ambatimokesh/HUB-SPOKE

- Designed a Hub-Spoke network (1 Hub, 2 Spoke VNets) with peering and controlled routing; secured VMs using NSGs and UDRs.
- Centralized monitoring with Azure Monitor, Log Analytics alerts, and Managed Grafana dashboards.
- Validated web, app, and database tiers (Nginx, Tomcat, MySQL) on Linux VMs with health-probe and failover testing.

TRAINING

Multi-Cloud DevSecOps Program - V Cube, Hyderabad — March 2026 - Present

- Hands-on training covering AWS, Azure, Linux, Terraform, Docker, Kubernetes, Jenkins CI/CD, Git & GitHub, GitHub Actions and security scanning (SonarQube, Trivy).

EDUCATION

Bachelor of Computer Applications - Mohan Babu University, Tirupati (CGPA: 8.5)	2025
Intermediate (BiPC) - Sri Chaitanya Junior College, Kurnool (CGPA: 7.95)	2020
Secondary School Certificate - Sri Chaitanya E.M. School, Nandyala (CGPA: 8.8)	2018

CERTIFICATIONS

- Introduction to Cloud Computing - IBM (Coursera)
- Introduction to Networking and Storage - IBM (Coursera)
- Cloud Virtualization, Containers and APIs - Duke University (Coursera)
- Version Control - Meta
